SAMPLE SPECIFICATION

Supreme Jet Dry Executive II

General

Scope:- Supply and install Supreme Jet Dry automatic hand dryer as shown on the plans

Materials

Primary materials:- Supreme Jet Dry Hand Dryer made from ABS/ Polycarbonate antimicrobial impregnated.

Workmanship

Using the mounting template supplied, position the mounting bracket and affix to the wall using the appropriate fixing for the type of wall.

The electrical connection can be made by fixed wiring of the correct cross section back to an isolating switch in a convenient location all as per local electrical codes of practice.

Hook top of dryer on to mounting bracket and secure the bottom of the machine with a single screw into the wall. The screw position is accessible after removal of the drip tray as per (5) on fixing template.

Liven machine and test operation.

Completion

Leave work clean, remove all trade rubbish from the site and leave the hand dryer cleaned and in working order.

Pass over warranties/ manuals/ cleaning and maintenance instructions to the principal.
