CoreLine Highbay IP65
*Instant frustration or **easy installation?***

Designed as a replacement for conventional 250 or 400W metal halide luminaires. It comes complete with a Flex and Plug and single point suspension, making connection quick and easy to install. The Highbay also features a new round dedicated optic, providing a softer more natural light.

Features and Benefits
- Strong energy saving credentials – system efficacy @135lm/W.
- Round exit window design - for easy alignment when installing multiple highbays in a row.
- Excellent glare control for narrow beam with an additional reflector.
- High quality aluminium die cast heatsink ensuring a long life in harsh environments.

Application
Warehouses, Distribution centres, General manufacturing areas, Exhibition halls, High ceiling applications
