

CoreLine Highbay IP40

Low achiever or *high performer*?

The CoreLine Highbay IP40 replaces traditional Philips 400W metal halide and T5 highbays. It has an attractive high-quality design with an assortment of different optics including a high rack option. With advanced options, such as a ZigBee Actilume wireless control, system energy savings can reach up to 88% when compared to traditional highbay luminaires.

Features and Benefits

- System efficacy of up to 140lm/W offers up to 73% energy savings compared to traditional HID systems.
- Three different distributions to precisely illuminate space efficiently.
- Robust aluminium extrusion body and quality Xitanium drivers ensuring luminaire longevity.

Application

Warehouses, Distribution centres, General high ceiling applications, Factories, Production lines, Large format retail
