Overview

Key Features

- 1) Large dimension range: Comfortably fits a wide range of head sizes. 17% more adjustable than earlier versions.
- 2) Wide cup opening: Ideal for workers with larger ears, or who wear hearing aids. Opening area of the cup increased by 16% over earlier versions.
- 3) Lightweight cushioned headband: Steel-wire construction with padded headband and precision micro adjustments designed for just the right fit around the ear.
- 4) Memory foam ear cushions: New unique memory foam that combines denser and softer foam than previous models, for greater comfort and attenuation. Reduces squeezing pressure on the head and enhances comfort.

Robust construction

- Steel wire framework
- ABS molded with internal baffle design for lighter weight, patent pending
- An oil-resistant cup surface to withstand oily, heavy-work environments and frequent cleaning

Air Flow Control Technology

Featuring a baseplate chamber and high-tech non-woven layer, Honeywell's Air Flow Control technology controls how sound reaches the ear, ensuring optimum noise attenuation across all frequencies.

PPE Integration

Easy to use and integrate with Honeywell hard hats and face shields. Can be assembled to a hard hat in approximately 7 seconds.

Attenuation Ratings

The attenuation level of each style is marked on the earmuff cup, for quick and easy on-site identification of the level of hearing protection provided.

Recommended Industries/Use

- Construction
- Manufacturing
- Medical
- Oil and Gas
- Utilities

Regulations

- 29 CFR 1910.95 - OSHA Occupational Noise Exposure (US)
- S3.19-1974 - Attenuation Test Protocol (US)
- Part II, (R.S.C. 1985, c. L-2) - Canada Labour Code
- Z94.2-1994 - Attenuation Test Protocol (CAN)

Warranty Information

There is a one year guarantee against defects in material and workmanship. The guarantee does not cover damage caused by misuse, abuse or unauthorized modifications.

Specifications

Over-the-Head

- Traditional-style earmuffs with an adjustable cushioned headband. Available in Low, Mid and High attenuation (NRR)

levels and folding and high visibility options.

Hard Hat

- Designed to be worn when also wearing a hard hat. Can be attached to a Honeywell hard hat in just 7 minutes. Available in Low, Mid and High attenuation (NRR) levels and a high visibility version.

Neckband

- Fitting around the neck from behind. Available in Low, Mid and High attenuation (NRR) levels.
