YEAR
WARRANTY

WE'VE GOT IT SEALED

Trade-Seals are a one piece self adhesive waterproofing collar used to seal penetrations in the building envelope. They are available in 10 sizes from 8mm - 220mm. Trade-Seals are BRANZ Appraised & can be used on all BRANZ Appraised building wraps & RAB systems in the New Zealand market.

They should be considered as a secondary flashing system & can be exposed to UV for up to 90 days. Trade-Seals are also a component of the Tekton Weatherization System BRANZ # 621. They are available from all good building, plumbing and electrical merchants. Please read the installation instructions carefully before installing.

Benefits of Trade-Seal

- **TRADE-SEAL** is a one piece self adhesive collar for sealing around pipe and conduit.
- **TRADE-SEAL** is a one component secondary flashing system.
- **TRADE-SEAL** can be used on all accepted wall underlays including bituminous paper.
- Can be installed on the inside of RAB systems & wall underlay's - retrofit installation.
- **TRADE-SEAL** requires no adhesives to hold in place.
- **TRADE-SEAL** can be left exposed to Weather and UV for up to 90 days.
- **TRADE-SEAL** will adhere to most clean and dry substrates including Fibre cement & Ply RAB board.
