

CAVIUS™

THE WORLD'S
SMALLEST
smoke alarm

Photoelectric Smoke Alarm

CAVIUS™ is the world's smallest smoke alarm, but contains some big features.

"Every year, the New Zealand Fire Service attended over 3,700 house fires. In over 80% of those fires, smoke alarms were either not installed or not working. Most fire fatalities occur in homes mainly while people are sleeping when they can't smell smoke. Working smoke alarms are your only voice."

FEATURES

- 10 year longlife battery
- A penetrating sound at 85 dB(A) at 3 metres
- 10 minute pause option
- 30 day low battery alert
- Unique smart-clip ceiling mechanism
- Aesthetically designed
- Easy installation
- Environmentally friendly
- New Zealand Building Code Compliant

CERTIFICATIONS

- AS3786, EN14604
- NF292
- RoHs
- Reach
- ActivFire®

TECHNICAL SPECIFICATIONS

- Sensor type: Photoelectric/Optical smoke detection
- Duracell Battery: Lithium CR123A 3V, 1600mAh
- Sound level: around 85db at 3 meters
- Optimal temperature of function: +4°C to +38°C
- Maximum Humidity: +95% Rh non-condensing
- Ceiling installation
